- 14:30 – 15:00 **Q&A and Conclusion**

The Clean Fleets project assists public authorities and fleet operators with the implementation of the Clean Vehicles Directive and the procurement or leasing of clean and energy-efficient vehicles.

Clean Fleets developed a guide on how to procure clean and energy-efficient vehicles in practice, following the Directive. The guide is accompanied by a toolkit of resources, such as a modular training package, a life cycle costing tool, sample tenders and good practice examples for capacity building through trainings and exchange.
